

Rhode Island Fishing Counts!

NOAA
FISHERIES

#fishRI

DEM
RHODE ISLAND

Rhode Island recreational anglers play an important role in maintaining healthy and productive fisheries.

Information you share with RI Division of Marine Fisheries field interviewers allows the **Marine Recreational Information Program** to estimate recreational catch.

Your data will be used by scientists and managers to monitor the health of fish stocks and set rules to ensure sustainable fishing opportunities for generations to come.

View the estimates. Query the data.
