I. Introduction

This procedure describes the process for initiating Secretarial review of fishery management actions recommended by regional fishery management councils. This procedure ensures that NMFS and the councils comply with the requirements of section 304(a) of the Magnuson-Stevens Fishery Conservation and Management Act.

II. Objective

This procedure describes the process NMFS will use to initiate Secretarial review and the documents that must be submitted by the Councils to NMFS to initiate Secretarial review. This procedure provides a standardized process for NMFS and the councils to follow when initiating Secretarial review of fishery management actions. This procedure is intended to ensure efficient review and implementation of fishery management actions and prevent delays in processing, as described in more detail in the attached memorandums (see Attachment).
III. Guidance

Procedure for Initiating Secretarial Review
Timely review of fishery management actions, in addition to being mandated under the Magnuson-Stevens Fishery Conservation and Management Act, is necessary to effectively address management needs in the fisheries. To accomplish this, it is imperative that the regional fishery management councils, the Regions, including General Counsel, and the Centers work together cooperatively to produce complete, high-quality documents that satisfy all statutory requirements and provide the public with the information necessary to comment on proposed measures. That collaboration must include coordinated efforts to agree on a schedule for submission and to prepare the analyses and documents required for Secretarial review, to the extent possible, in advance of the Council’s final decision to submit a fishery management plan (FMP) or amendment.

1. All documents required for Secretarial review will be submitted by the Councils to the Regional Director. Copies should be sent simultaneously to NMFS Headquarters Regulatory Services.

2. Any of the required documents that have not been prepared by the Council, by agreement with the Regional Director (e.g., PRA package, proposed rule, etc.) must be prepared by the Regional Office in consultation with the Council or, if prepared by the Science Center, be submitted to the Regional Director. The Regional Director will send to NMFS Clearance copies of all documents received as soon as possible to allow preliminary review. Before the “transmit date” is declared, all documents will be considered drafts only. Close consultation between the Regional Office and Headquarters is strongly encouraged at this stage.

3. The Regional Director will decide whether the required documents are present and meet at least the minimum requirements for making the necessary determinations. If any document is deemed inadequate to make those determinations, it must be made adequate before the FMP or amendment is considered complete for purposes of declaring the transmit date.

4. Once the transmit date has been declared, the Regional Director will recommend to the Assistant Administrator, based on a preliminary evaluation of consistency with the national standards, whether to proceed with Secretarial review or to disapprove the FMP or amendment.

5. The Regional Director will, on the transmit date, send all necessary documents for Secretarial review to NMFS Headquarters Regulatory Services, along with a completed checklist, certifying that the required documents are present and adequate to make all required determinations. The Regional General Counsel should also certify that the package, including the proposed rule, is complete and adequate.

6. If disapproval is recommended, the Regional Director must immediately notify the Assistant Administrator of that recommendation.
7. Upon receipt of the certified, complete submission package from the Regional Director, NMFS Headquarters will immediately commence a review to determine preliminarily whether the FMP or amendment is consistent with the national standards, other provisions of the Magnuson Act, and all other applicable law and whether the documents are sufficient in scope and substance to warrant review under the Magnuson Act.

8. If Headquarters concurs with the recommendation of the Regional Director that a preliminary evaluation indicates consistency with the national standards and other applicable law, a notice of availability will be published in the Federal Register and Secretarial Review will continue. If Headquarters does not concur with the recommendation, the Assistant Administrator will determine whether to disapprove the FMP or amendment. No more than 2 working days should elapse between the transmit date and filing the notice of availability or deciding not to proceed with Secretarial review.

Documents Required to Initiate Secretarial Review
The following documents are required to initiate Secretarial review. In their absence, the Secretary, and those delegated authority by the Secretary, cannot make all determinations required by the Magnuson-Act and other applicable law. The required documents are:

1. FMP or FMP amendment.
2. Proposed regulations, if any.
3. A regulatory impact review (RIR).
4. A regulatory flexibility analysis (RFA), if the action is significant under the Regulatory Flexibility Act.
5. An environmental assessment (EA), environmental impact statement (EIS), or supplemental environmental impact statement (SEIS).
6. A section 7 biological opinion under the Endangered Species Act, if required or an informal consultation signed by the Regional Director concluding that formal consultation is not required.
7. A request for Approval of Information under the Paperwork Reduction Act (PRA package), if required.

In addition, the following documents are needed to process the FMP or FMP amendment. They must be prepared and submitted along with the FMP or amendment package to NMFS Headquarters Regulatory Services. Because these documents are administrative, rather than statutory, requirements their availability does not impact declaration of the transmit date. However, failure to prepare and send these documents to NMFS Headquarters Regulatory Services in a timely manner will delay the review process and filing of the proposed rule. These
additional documents are:

1. Regional Director’s decision memorandum to publish the proposed rule.
2. Regional Attorney review memo.
3. Science Director’s certification (for overfishing definitions).
4. Notice of availability to be published in the *Federal Register*.
5. Memorandum from the Assistant Administrator to General Counsel, DOC.
6. Memorandum to Small Business Administration, if required.
7. Memorandum from the Assistant Administrator to the Under Secretary for Oceans and Atmosphere (if the action is controversial).
8. Copies of letters sent to the states regarding Coastal Zone Management Act consistency.

If they are needed, the following additional documents should be provided to NMFS Headquarters as early in the review process as they are available:

1. Federalism Assessment.
2. Taking Implications Assessment.
MEMORANDUM FOR:  Regional Directors  
FROM:    William W. Fox, Jr.  
SUBJECT:  Procedures for Initiating Secretarial Review of Fishery Management Plans and Amendments

At the Council Chairman's Meeting in Tampa, discussion of the draft interpretive rule regarding Magnuson Act fishery management plans (FMPs) and FMP amendments confirmed that there is need to standardize procedures for initiating Secretarial review of these actions. Significant delays are occurring in processing fishery management actions that lack critical elements. Every FMP or amendment must be accompanied by all documents necessary to permit timely conformance with the Magnuson Act and other applicable law; Secretarial review cannot begin without them.

There was strong general agreement among the Council Chairman and Executive Directors that formal review should not begin before the package is complete. Therefore, we agreed to establish written procedures for starting formal review to try to resolve the problem. If the situation is not corrected, we will again consider publication of an interpretive rule. Therefore, effective immediately, the following procedure will be followed for initiating Secretarial review of FMPs and amendments.

Procedure for Initiating Secretarial Review

1. All documents required for Secretarial review will be submitted by the Councils to the Regional Director (see below for a list of these documents). Copies should be sent simultaneously to F/CM, but the copies will be considered only drafts at this stage.

2. Any of the required documents that have not been prepared by the Council, by agreement with the Regional Director (e.g., FRA package, proposed rule, etc.), must be prepared by the Regional Office in consultation with the Council or, if prepared by the Science Center, be submitted to the Regional Director. The Regional Director will send to F/CM copies of all documents received as soon as possible to allow preliminary review before the "transmit date" is declared, all documents will be considered drafts only. Close consultation between the Regional Office and Headquarters is strongly encouraged at this stage.

3. The Regional Director will decide whether the required documents are present and meet at least the minimum requirements for making the necessary determinations. If any document is deemed inadequate to make those determinations, it must be made adequate before the FMP or amendment is considered complete for review.
purposes of declaring the "transmit date." The proposed rule must accurately reflect the contents of the FMP or amendment it is to implement. The date on which all of the required documents have been received by the Regional Director and have been adjudged to be adequate is the "receipt date," and the Regional Director will then declare the "transmit date," which is the date 5 days prior to the "receipt date."

4. If any Council disputes any decision made by the Regional Director, the Council may appeal to the AA who will make a final determination within 5 working days of receipt of the Council's appeal.

5. Once the "transmit date" has been declared, the Regional Director will recommend to the Assistant Administrator, based on a preliminary evaluation of consistency with the national standards, whether to proceed with Secretarial review or to disapprove the FMP or amendment.

6. The Regional Director will, on the "receipt date," send all necessary documents for Secretarial review to F/CM, along with a completed checklist (see attachment) certifying that the required documents are present and adequate to make all required determinations. The Regional General Counsel should also certify that the package, including the proposed rule, is complete and adequate.

7. If disapproval is recommended, the Regional Director must immediately notify the Assistant Administrator of that recommendation.

8. Upon receipt of the certified, complete submission package from the Regional Director, NMFS Headquarters will immediately commence a review to determine preliminarily whether the FMP or amendment is consistent with the national standards, other provisions of the Magnuson Act, and all other applicable law and whether the documents are sufficient in scope and substance to warrant review under the Magnuson Act.

9. If Headquarters concurs with the recommendation of the Regional Director that a preliminary evaluation indicates consistency with the national standards and other applicable law, a notice of availability will be published in the Federal Register and Secretarial review will continue. If Headquarters does not concur with the recommendation, the Assistant Administrator will determine whether to disapprove the FMP or amendment. No more than 2 working days should elapse between the "receipt date" and filing the notice of availability or deciding not to proceed with Secretarial review. F/CM will prepare a schedule for processing the action under the Magnuson Act and will distribute the schedule to the Regional Office and to GCF. "Day 1" is the day (whether weekend, holiday, or working day) following the "receipt date."

Documents Required to Initiate Secretarial Review

The following documents are required to initiate Secretarial review. In their absence, the Secretary, and those delegated authority by the Secretary, cannot make all determinations required by the Magnuson Act and other applicable law. The required documents are:

1. FMP or FMP amendment.
2. Proposed regulations, if any.
3. A regulatory impact review (RIR).
4. A regulatory flexibility analysis (RFA), if the action is significant under the RFA.
5. An environmental assessment (EA); or environmental impact statement (EIS); or supplemental environmental impact statement (SEIS).
6. A section 7 biological opinion under the Endangered Species Act, if required; or an informal consultation signed by the Regional Director concluding that formal consultation is not required.
7. A Request for Approval of Information Under the Paperwork Reduction Act ("PRA package"), if required.

In addition, the following documents are needed to process the FMP or FMP amendment. They must be prepared and submitted as soon as possible after the "receipt date," preferably along with the FMP or amendment package, to Headquarters (attention: F/CM). Because these documents are administrative, rather than statutory, requirements, their availability does not impact declaration of the "transmit date." However, failure to prepare and send these documents to F/CM in a timely manner will delay the review process and filing of the proposed rule. These additional documents are:

1. Regional Director's decision memorandum to publish the proposed rule (signed original).
2. Regional Attorney's "work product" (signed original).
3. Science Director's certification (for overfishing definitions) (signed original).
5. Memorandum from Assistant Administrator to General Counsel, DOC.

6. Memorandum to Small Business Administration, if required.

7. Memorandum from the Assistant Administrator to the Under Secretary for Oceans and Atmosphere (if the action is controversial).

8. Copies of letters sent to the states regarding Coastal Zone Management Act consistency.

If they are needed, the following additional documents should be provided to F/CM as early in the review process as they are available:

1. Federalism Assessment.

2. Taking Implications Assessment.

Conclusion

Timely review of fishery management actions, in addition to being mandated under the Magnuson Act, is necessary to address effectively problems in the fisheries. To accomplish this, it is imperative that the Councils, the Regions, including General Counsel, and the Centers work together cooperatively to produce complete, high-quality documents that satisfy all statutory requirements and provide the public with the information necessary to comment on proposed measures. That collaboration must include coordinated efforts to agree on a schedule for submission and to prepare the analyses and documents required for Secretarial review, to the extent possible, in advance of the Council's final decision to submit an FMP or amendment. You should make every effort to achieve this.

MEMORANDUM FOR:  William W. Fox, Jr.
FROM: [Regional Director]
SUBJECT: Transmit Date for [Title of FMP or Amendment]

The [Council] has submitted [Title of FMP or FMP amendment] for Secretarial review. I have reviewed the [FMP or amendment] and have determined that all documents required to make determinations under the Magnuson Act and other applicable law are present and adequate to make the required determinations. Therefore, the "receipt date" for this action is [date] and I declare that the "transmit date" for this action is [date]. I have also completed a preliminary evaluation of the action for consistency with the national standards, other provisions of the Magnuson Act, and other applicable law and recommend that a notice of availability be published in the Federal Register. The following documents, which accompany this memorandum, comprise the complete [FMP or amendment] submission package:
<table>

MEMORANDUM FOR: OIG - Andrew Cochran
FROM: GCF - Margaret Frailey Hayes
SUBJECT: Initiating Secretarial Review of FMPs and Amendments.

This memo is to clarify Bill Fox’ March 1991 memo entitled "Procedures for Initiating Secretarial Review of Fishery Management Plans and Amendments," and to distinguish between the decision to "start the clock" for Secretarial review and the decision to begin the public review process.

P.L. 99-659 amended section 304(a) of the Magnuson Fishery Conservation and Management Act in 1986. Congress wanted to speed the Secretarial review process by putting the Council in charge of starting the 95-day "clock." They did this by adding paragraph (3) as follows:

(3)(A) The Secretary shall take action under this section on any fishery management plan or amendment which the Council characterizes as being a final plan or amendment.

(B) For purposes of this section, the term "FMP" means the 95th day on which a Council transmits to the Secretary a fishery management plan, or an amendment to a plan, that it characterizes as a final plan or amendment.

At the same time, Congress inserted a new provision "(a)(4)(A)" to allow the Secretary to make a preliminary evaluation of the FMP or amendment and to immediately disapprove it:

(1) After the Secretary receives a fishery management plan, or amendment to a plan, which was prepared by a Council, the Secretary shall—

(A) immediately make a preliminary evaluation of the management plan or amendment for purposes of deciding if it is consistent with the national standards and sufficient in scope and substance to warrant review under this subsection and—

(i) if that decision is affirmative, implement subparagraphs (B), (C), and (D) with respect to the plan or amendment, or
(ii) if that decision is negative—
(I) disapprove the plan or amendment, and
(II) notify the Council, in writing, of the
disapproval and of those matters specified in
subsection (b)(2)(A), (B), and (C) as they relate
to the plan or amendment.

The House Report described the amendment as requiring "the
Secretary to commence a review of FMPs or amendments to FMPs of
the fifth day after the day on which a Council has transmitted to
the Secretary a document that characterizes an FMP or an
FMP amendment. The Secretary is required to immediately make a
preliminary evaluation of the FMP or FMP amendment for the
purpose of deciding whether or not it is consistent with the
national standards and sufficient in scope and substance to
warrant further review under this subsection." (H.R.99-165 at
33, June 10, 1985).

Thus the Council itself is to begin the Secretarial review by
transmitting the FMP or amendment. The fifth day thereafter is the
"receipt date" (Day 0), after which the 95-day schedule
commences. The preliminary evaluation occurs within the first
few days; the notice of availability of the FMP or amendment in
the Federal Register is public evidence of an affirmative
finding.

The problem with the 1986 amendment is that Councils were
transmitting FMPs and amendments without the other documents
needed to meet statutory deadlines. The Regional Director would
declare a "receipt date" even though the proposed regulations
were not in acceptable Federal Register format, or even though no
Paperwork Reduction Act justification had been prepared. This
meant proposed regulations could not be filed by Day 15, as
required by section 304(a)(1)(D). Because we have insisted on
honoring Congressional intent to retain the 45-day public comment
period on proposed regulations, the time left at the end of this
period but before Day 95—instead of the 35 days contemplated by
section 304(a)—was reduced to a few weeks or even days. Once or
twice we thought Day 95 might occur before the end of the comment
period.

Some Regional Directors dealt with this problem informally by
telling Councils they would not declare a "receipt date" until
all the "pieces" were present and acceptable for processing.
F/C/M and GCF prepared an interpretive rule in 1990 to formalize
this practice. In early 1991, at the Council Chairman's meeting,
there was consensus that no interpretive rule was needed, only
written guidance, to insure that all necessary documents were
available before Secretarial review began. So Bill Fox issued
his memorandum to the Regional Directors in March of 1991.

The memo states the FWC will decide whether the required
documents are present and meet at least the minimum requirements
for making the necessary determinations." If satisfied with the
documents, the RD declares the "receipt date" and the derivative "transmit date." Then, as a separate step, he "will recommend to the Assistant Administrator, based on a preliminary evaluation of consistency with the national standards, whether to proceed with Secretarial review or to disapprove the FMP or amendment." F/CM conducts its own preliminary evaluation of the FMP as well.

Because the Fox memo treats both "starting the clock" and preliminary evaluation, some readers may have confused the two procedures. Steve Pennoyer, however, did send two separate memos, both dated November 13, 1991, on Amendments 18/23. One announced he would declare December 1 as the receipt date. The other recommended sending the amendments forward for public review.

It is true that the second memo does not recite that the amendments are "consistent with the national standards and sufficient in scope and substance to warrant review." Pennoyer expressed dissatisfaction with the SEIS and other supporting documents, but held out the possibility that deficiencies could be repaired during the public comment periods. He would not say the amendments were consistent with the national standards; but, because the analyses were lacking, he would not say they were inconsistent and had to be disapproved. By recommending publication of the proposed regulations, Pennoyer by implication made an affirmative decision based on his preliminary evaluation.

I do not think Pennoyer's decision was the only defensible one under the circumstances, but it can be defended. Given that the review is both immediate and preliminary, the decision to make an early disapproval really must be based on a finding that the amendments are inconsistent and insufficient, not on an inability to find that they are consistent and sufficient. There is some evidence in the record that the analyses could be repaired, which might allow findings of consistency to be made in the end.
