ASAMM-Beaufort – Flight 44 – 3 October 2019

Flight was a partial survey of transects 120, 121, 122, 123, 124, and 125, and the coastal transect from east of Smith Bay to Cross Island.

Total hours flown: 4.8
Total transect hours: 3.5
Number of bowhead whales seen: 0 (0 calves)

Survey conditions included partly cloudy to overcast skies, <1 km to unlimited visibility, with glare and low ceilings, and Beaufort 2 to 5 sea states. There was no sea ice in the area surveyed. Low ceilings precluded further survey effort.

Sightings: Belugas, small unidentified pinnipeds, and polar bears. The polar bears were sighted on barrier islands in the western half of survey block 1 and on Cross Island.

Preliminary Summary, Flight 44 Date: Thursday, October 03, 2019
