

Explanation of Spreadsheet Data

Explanation of Spreadsheet and Data

This spreadsheet provides field and fish data collected during electrofishing surveys conducted during the month of March 2019 for the Stanislaus River Native Fish Plan.

Background information, key correspondence, and the technical study plan can be found at: ['link'](#)

For questions or more information, contact: info@fishbio.com

Spreadsheet	Definition	Column Heading Definitions
Target Species Summary	Provides summary counts of captured target species by site (or rkm), by date, and species. See study plan for distinction between target and non-target species.	RKM = River kilometer position as measured from the confluence of the Stanislaus River and San Joaquin River
Target Species Summary	Provides summary counts of captured target species by site (or rkm), by date, and species. See study plan for distinction between target and non-target species.	Date = Date of survey
Target Species Summary	Provides summary counts of captured target species by site (or rkm), by date, and species. See study plan for distinction between target and non-target species.	BAS = Unidentified black bass, BGS = Bluegill, etc. = species codes (See 'Species Code' tab for all species)
Target Species Catch	Provides individual level fish data for all target species captured during electrofishing surveys	SampleDate = Date of Survey
Target Species Catch	Provides individual level fish data for all target species captured during electrofishing surveys	StartTime = Time when electrofishing survey was begun at each unit
Target Species Catch	Provides individual level fish data for all target species captured during electrofishing surveys	EndTime = Time when electrofishing survey was ended at each unit
Target Species Catch	Provides individual level fish data for all target species captured during electrofishing surveys	SamplingUnitNo = unit number (ordered from #1 near Oakdale to #227 at confluence). Each unit was 300 meters long.
Target Species Catch	Provides individual level fish data for all target species captured during electrofishing surveys	RKM = River kilometer position as measured from the confluence of the Stanislaus River and San Joaquin River
Target Species Catch	Provides individual level fish data for all target species captured during electrofishing surveys	Bank = 'river right' or 'river left' as you are facing downstream
Target Species Catch	Provides individual level fish data for all target species captured during electrofishing surveys	Event = The primary sampling occasion for each year. See study plan for more details
Target Species Catch	Provides individual level fish data for all target species captured during electrofishing surveys	Pass = The secondary sampling occasion for each primary occasion. See study plan for more details
Target Species Catch	Provides individual level fish data for all target species captured during electrofishing surveys	Species = Species identification; see 'Species Code' tab for species abbreviations
Target Species Catch	Provides individual level fish data for all target species captured during electrofishing surveys	ForkLength = Fork length measurement in millimeters (mm)
Target Species Catch	Provides individual level fish data for all target species captured during electrofishing surveys	TotalLength = Total length measurement in millimeters (mm)
Target Species Catch	Provides individual level fish data for all target species captured during electrofishing surveys	Condition = General condition of fish
Target Species Catch	Provides individual level fish data for all target species captured during electrofishing surveys	DietCollected = Indicates whether diet was collected (Yes = 'Yes diet collected and stomach contents present'; Empty = 'Diet attempted to be collected, but no stomach contents present'; No = 'No diet collected')
Target Species Catch	Provides individual level fish data for all target species captured during electrofishing surveys	ScalesCollected = Indicates whether scales were collected or not
Target Species Catch	Provides individual level fish data for all target species captured during electrofishing surveys	Recapture = Indicates whether fish has previously been captured and PIT tagged
Target Species Catch	Provides individual level fish data for all target species captured during electrofishing surveys	PITtagNo = unique identification number of passive integrated transponder (PIT) implanted into each fish
Target Species Catch	Provides individual level fish data for all target species captured during electrofishing surveys	Notes = general notes about fish condition, diet collected, etc.
Non-Target Catch	Provides individual and batch level data for all non-target species captured during electrofishing surveys	All column headings the same as 'Target Species Catch' except for 'Count'. Count = the number of fish either measured or not measured for non-target species.
Species Code	Provides species abbreviations and species names for typically captured fish in San Joaquin River basin	N/A
